

Edwin Julian

Front-End Engineer | Real-Time & Data Visualization Systems

Remote · English (Professional)

edjulsin@gmail.com | edjulsin.dev | github.com/edjulsin | linkedin.com/in/edjulsin

Professional Summary

Product-focused Front-End Engineer with **5+ years of experience** building **interactive, real-time web applications** that support business operations and improve digital product experiences. Skilled in **React, Next.js, TypeScript, Tailwind CSS**, and **D3.js**, with a strong focus on **performance optimization, scalable front-end architecture**, and **highly interactive data-driven interfaces**.

Experienced in developing complex UI systems including **real-time dashboards, interactive visualizations, mapping and geospatial interfaces**, and **visual editors**. Passionate about building **fast, intuitive**, and **reliable user experiences** that simplify complex workflows, improve usability, and support **business-critical systems** in collaborative remote environments.

Technical Skills

Frontend & UI Systems

React, Next.js (App Router), JavaScript(ES6+), Context API, TypeScript, HTML5 Canvas, RxJS, Jotai, D3.js, Tailwind CSS, SASS, Radix UI, Figma

Backend & Platform

Supabase (PostgreSQL, Auth, RLS, Storage), REST APIs, Node.js, Express.js, Docker, Vercel, Redis, Mysql, MongoDB

Architecture & Quality

State Management, Real-Time Systems, Performance Optimization, CI/CD (GitHub Actions), Vitest, Playwright, Webpack, Vite, SEO, Core Web Vitals, WCAG, Biome, ESLint, FP, Copilot

Experience

FINNS Beach Club - Product Engineer (Contract)

Remote

January 2026 – April 2026

Engineered a **booking UX system** with an **interactive seat selection map**, capable of handling **1,000+ seats with dynamic state and feature variations**, improving usability and performance across the booking flow and **reducing booking friction by 50%**.

Katt Interior - Product Engineer (Contract)

Remote

January 2025 – January 2026

Designed and developed a **CMS and drag-and-drop visual editor** for creating customizable, SEO-friendly pages that increase brand visibility while improving content management workflows with **cost-efficient operations, smooth editing experience, and 80% faster initial page rendering through optimized image and asset delivery.**

Krypton - Independent Product Engineer

Onsite

January 2021 – Ongoing

Building a **real-time trading and charting platform** from scratch featuring **interactive visualizations** and **high-performance streaming interfaces**, designed to help traders make faster, data-driven decisions in fast-moving markets, while maintaining smooth rendering performance at **60 FPS with 2,000+ real-time data points.**

Selected Projects

Krypton — Real-Time Trading & Charting Platform ([Live Demo](#))

React, RxJS, D3.js, HTML5 Canvas, Webpack, Express

A **TradingView-class financial visualization platform** with fully customizable real-time charts, designed for fast-moving market analysis with low-latency streaming and high interactivity.

- Built a **real-time charting system from the ground up**, rendering **2,000+ live data points at 60fps**, enabling smooth interaction with high-frequency market data without performance degradation.
- Designed **streaming data architecture using RxJS**, handling WebSocket ingestion with **resilient reconnection, retry logic, and backpressure control**, supporting seamless multi-chart and multi-timeframe synchronization.
- Developed a **high-performance canvas rendering engine** with fluid **pan/zoom interactions**, gesture support, and responsive layouts, delivering a fast, intuitive experience across desktop and mobile devices.
- Shipped a **modular charting product system** with configurable indicators, chart types, overlays, and themes, plus intuitive UI controls (color picker, popovers) enabling rapid customization for traders.

FINNS — Booking Engine & Interactive Seat Chart ([Live Demo](#))

Next.js, TypeScript, D3.js, Tailwind CSS, Radix UI, Figma

An **interactive real-time seat map system** for booking platforms, featuring zoomable map-like navigation, dynamic seat selection, and mobile-optimized **high-conversion user flows.**

- Built an **interactive real-time seat map interface** with smooth transitions and responsive feedback, delivering a map-like UX for intuitive seat navigation and improved perceived performance.
- Designed a **conversion-optimized booking flow** using streamlined seat selection patterns (carousels, collapsible panels), reducing cognitive load and improving decision speed.
- Engineered a **non-blocking, adaptive UI system** with **dark mode and focus mode experiences**, reducing friction and visual overload across desktop and mobile devices.
- Implemented **smart seat selection features** (best available, filtering, auto-suggest) and **shareable URL state**, enabling faster decision-making and more seamless booking journeys.

Katt — CMS & Visual Blog Editor ([Live Demo](#))

Next.js, TypeScript, Supabase, Tailwind CSS, Radix UI

A custom **CMS and drag-and-drop visual editor** for an image-heavy interior design platform, enabling SEO-friendly page generation and an optimized image pipeline for **near-instant page loads**.

- Led the development of a production-grade CMS, owning the system end-to-end across **frontend architecture, data modeling, authentication/authorization system, CI/CD pipelines, and deployment**, with **automated testing** integrated throughout the workflow.
 - Designed and built a **drag-and-drop visual editor** with a custom layout engine, supporting configurable transitions, image crop/resize tools, and responsive grid generation for fully customizable, **SEO-optimized page layouts**.
 - Optimized **image-heavy rendering performance** using **Next.js Image Optimization, ISR, and Core Web Vitals tuning**, improving load performance by **80%** while preserving high visual fidelity.
 - Implemented a secure **multi-role RBAC system** using **Supabase Row Level Security (RLS)** and fine-grained permission policies, enabling controlled collaboration across different user roles and access levels.
-

Education

Full Stack Web Development Certification

freeCodeCamp

January 2019 – January 2021

Bachelor of Economics

Parahyangan Catholic University

August 2010 – March 2016
